***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to an isolated truncated Nogo-A polypeptide.

Group II, claim(s) 7-12, drawn to a nucleic acid molecule encoding the truncated Nogo-A polypeptide, a vector containing the DNA molecule, a host cell and a method of making polypeptides.

Group III, claim(s) 13-20, drawn to a method for identifying a compound having detectable affinity to a Nogo-A polypeptide.

Group IV, claim(s) 21, drawn to an antibody or a fragment thereof having the variable domains of SEQ ID NO:11 and SEQ ID NO:12.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The 1<sup>st</sup> claimed invention is drawn to a truncated Nogo-A polypeptide, which is anticipated by WO0031235 (published Jun 2, 2000). WO0031235 teaches a truncated Nogo-A (see abstract, figure 18). Thus, the Invention of the Group I was found to have no special technical feature that defined the contribution over the prior art of

WO0031235. Since the 1<sup>st</sup> claimed invention has no special technical feature, it cannot share a special technical feature with the other claimed inventions. Thus, Applicant's inventions do not contribute a special technical feature when view over the prior art, they do not have a single inventive concept and so lack unity of invention.

In addition, Group I is drawn to a technical feature of an isolated truncated Nogo-A polypeptide. Group II is drawn to a technical feature of a nucleic acid molecule encoding the truncated Nogo-A polypeptide, a vector containing the DNA molecule, a host cell and a method of making polypeptides. Group III is drawn to a technical feature of a method for identifying a compound having detectable affinity to a Nogo-A polypeptide. Group IV is drawn to a technical feature of an antibody or a fragment thereof having the variable domains of SEQ ID NO:11 and SEQ ID NO:12. Since each group contributes to a different technical feature, Applicant's inventions do not have a single inventive concept and thus lacks unity of invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). In order to be fully responsive, Applicant is required to elect a single group from designated Groups I-IV as set forth above to which the claims will be restricted, even though the requirement is traversed. The subject matter for examination will be restricted to the extent of the subject matter of the elected group.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (571) 272-1600.

7. Papers relating to this application may be submitted to Technology Center 1600, Group 1649 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (571) 273-8300.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chang-Yu Wang, Ph.D. whose telephone number is (571) 272-4521. The examiner can normally be reached on Monday-Thursday and every other Friday from 8:30 AM to 6:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres, Ph.D., can be reached at (571) 272-0867.
